

BIZAGI CLOUD END USER LICENSE AGREEMENT

Introduction:

- This Bizagi Cloud End User License Agreement (“EULA”) governs End User’s access to and use of the Bizagi Cloud Services, as more fully described in Schedule 1, which is offered through a Bizagi Authorized Reseller and accessed by End User via the internet (the “Services”).
- Please read this EULA carefully. By accessing or using the Services, End User agrees to the terms of this EULA. If End User does not agree to the terms of this EULA, it may not access or use the Services.
- This EULA is a binding contract between Bizagi Group Corp and its Affiliates (“Bizagi” or “We”) and the company or other legal entity that the individual accepting this EULA represents (“End User”) either via signature on this EULA or by signing a separate document that references this EULA via URL.
- Bizagi and End User are also referred to individually as a “party” and collectively as the “parties”.

1. License Grant / Excess Use

- a. Subject to End User’s strict compliance with the terms of this EULA, and payment of any applicable Fees, Bizagi hereby grants to End User, during the Subscription Term, a limited, worldwide, non-exclusive, non-transferable, non-sublicensable right to access and use the Services via username and password over the Internet up to (a) the number of BPUs permitted for the Performance Level subscribed to and / or (b) the number of Authorized Users permitted under the subscription, as applicable.
- b. **Scale Up / BPU Packages.** If End User needs to increase its usage of Automation Service during the Subscription Term, there are two options:
 - i. End User may request to scale up to a higher Performance Level for any of End User’s Environments by creating a Support Ticket in the Bizagi Support Center. If End User selects this option, Bizagi will work with End User to determine the appropriate Performance Level and additional Subscription Fees, and Bizagi will process the scale up as soon as possible, generally within 10 business days. If End User elects to Scale Up under this section, End User’s corresponding ODS environment and Disaster

Recovery Service Environments, if any, will also be Scaled Up to the appropriate level subject to payment of additional Subscription Fees.

- ii. End User may elect to purchase BPU Packages (in amounts defined by Bizagi) as long as the increased number of BPUs is less than the number of BPUs permitted under the next higher Performance Level. For example, if the Performance Level End User has chosen includes 20 BPUs, End User can buy a BPU Package as long as the increased number of BPUs is less than 30 BPUs (the next higher Performance Level). If End User chooses this option, Bizagi will provide the Bizagi Authorized Reseller with an Order Form that will include the number of BPUs included in the BPU Package and the additional Subscription Fees.
 - iii. In each of the above options, once the change goes into effect, Bizagi will invoice the Bizagi Authorized Reseller, and End User will be required to pay, the prorated Subscription Fees for the BPU Package or Performance Level, as applicable, meaning Bizagi will only charge the End User through Bizagi Authorized Reseller for the remaining number of days of the current annual period of the Subscription Term.
- c. **Automatic Scale Up.** Bizagi will generate a report each month during the Subscription Term showing End User's BPU consumption during the previous month (a "BPU Report"). If a BPU Report shows that End User has used more BPUs than End User was permitted for two months in a row, and End User does not scale up to a higher Performance Level or purchase a BPU Package following the process shown in Section 1(b) above during that 2-month period, Bizagi will notify End User and automatically scale End User up to the appropriate Performance Level. Bizagi will determine the appropriate Performance Level based on End User's average BPU usage during the previous 2-month period. Once the change goes into effect, Bizagi will invoice the Bizagi Authorized Reseller, and End User will be required to pay, the prorated Subscription Fees for the higher Performance Level, meaning Bizagi will only charge End User through the Bizagi Authorized Reseller for the remaining number of days of the current annual period of the Subscription Term. If Bizagi Scales Up the End User's Performance Level under this section, End User's corresponding ODS environment and Disaster Recovery Service Environments, if any, will also be Scaled Up to the appropriate level subject to payment of additional Subscription Fees.

- d. **Scale Down.** If End User determines that it needs less BPUs, and as long as there are no technical limitations that would prevent it, End User may request, through the Bizagi Authorized Reseller, to Scale Down to a lower Performance Level. The Scale Down will go into effect at the beginning of the next Renewal Term.

Schedule 1 – Bizagi Cloud Services Platform Overview

Our Cloud Services Platform:

- 1.** Offers a low-code automation solution for our customers. Using the Cloud Services our End Users may easily design and deploy solutions to enhance their processes and modernize their operations because of its low-code methodology. This means that our End Users can rapidly and effectively design and deploy process automation solutions using the Cloud Services, even without in-depth coding knowledge.
- 2.** Has a service-oriented architecture, which has been designed and built for the cloud. By implementing a highly modular structure, based on a service-oriented architecture, the Cloud Services are supported and independently implemented and are easy to upgrade, while taking advantage of modern services that enrich security, reliability, and scalability.
- 3.** Has been designed with security as its top priority using technologies, which allow an isolated environment for each End User, delivering a virtual private cloud where customer data is not commingled with that of other customers. The Bizagi Cloud Services platform has security controls and characteristics that guarantee the integrity, confidentiality, and availability of the data.

Product Name	 Modeler Services	 Studio Cloud Services	 Automation Service
General Description	<p>With Bizagi Modeler Services, you and your team collaborate by modeling, documenting, simulating, publishing and sharing Processes in industry standard BPMN (Business Process Model Notation).</p>	<p>After modeling the Process, the next step is to build, or automate, the Process. Automating involves converting Process activities into Applications. Studio Cloud Services allows you and your team to collaborate and create Applications in the cloud, from anywhere in the world.</p>	<p>Once your Applications are built, they can be deployed to Automation Service in a Testing, Production, or other Non-Production Environment. Bizagi presents deployed Applications in a web-based Work Portal that you access through a browser. The Application runs in the cloud.</p>
License Model	<p>User-Based</p>	<p>User-Based</p>	<p>Usage (BPU) Based, there is no limit of Authorized Users.</p>
What is included in the Process Automation Bundle?	<p>You will receive a fixed package of Authorized Users for Modeler Services which will be specified on the Order Form depending on the Bundle purchased.</p>	<p>You will receive a fixed package of Authorized Users which will be specified on the Order Form, and 1 Development Environment with your initial subscription.</p>	<p>You will receive access to:</p> <ul style="list-style-type: none"> • 1 Testing Environment • 1 Production Environment • 1 VPN (Virtual Private Network) connection. • 1 ODS instance (Operational Data Store) Instance is included for each of the first Production, Test, and Development Environments included in the bundle. Customer is required to purchase additional ODS instances for each additional Environment purchased.

			For each Environment, you will be entitled to use up to the number of BPUs identified in the Order Form.

Additional Services (additional Subscription Fees apply). Subject to availability at time of contracting.	<ol style="list-style-type: none"> 1. Additional packages of Authorized Users. For Studio Cloud Services, you may purchase additional packages of Authorized Users if needed. 2. Disaster Recovery. <ol style="list-style-type: none"> a. Automation Service is provisioned at an isolated primary site whose geographic location is chosen according to your requirements and will be listed in the applicable Order Form. b. When you purchase the Disaster Recovery service, Bizagi will provide a secondary site (called a recovery site) to be used if the primary site becomes inoperative due to a disaster. c. Bizagi uses a paired region to provision the secondary site. The paired region is at least 300 miles from the primary site. d. There are two options for Disaster Recovery: Database Only and Full Replica. <ol style="list-style-type: none"> i. For the <u>Database Only</u> option and <u>Full Replica</u> option, the Database Recovery Point Objective (RPO) is 5 minutes and the File Storage RPO is 15 minutes. ii. For the <u>Database Only</u> option, complete Environment Recovery Time Objective (RTO) is 18 hours. iii. For the Full Replica option, complete environment Recovery Time Objective (RTO) is 6 hours. 3. Additional Environments / Additional Projects. You may purchase additional Testing Environments, Production Environments, other Non-Production Environments, and Development Environments.
