

Best-in-Breed, Low-Code, End-to-End, Intelligent Process Automation

ABBYY Digital Intelligence technology combined with Bizagi Low-Code Process Automation delivers a scalable, best-in-breed, end-to-end, intelligent low-code process automation solution. This combination of technologies delivers significant value to enterprises in financial services, insurance, public sector, manufacturing, and other industries by improving customer experiences, reducing operating costs, and increasing competitiveness.

Challenge

More than 75 percent of business processes contain documents and other unstructured content like images, text, and email. Before this type of content can be useful and integrated into Bizagi document-driven business processes, the content needs to be transformed into meaningful structured information.

Solution

ABBYY Digital Intelligence technologies and solutions turn unstructured content into structured, actionable information, enriching Bizagi automation orchestration to be content-enabled while spanning across people, processes, systems, and bots.

Benefits

Comprehensive process automation.

ABBYY extends Bizagi process applications by automating the receipt, classification, and data extraction of business process-related documents and other unstructured content into usable data. Seamless end-to-end automation is achieved no matter what level of process or content complexity.

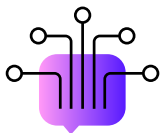

Best-in-breed technologies.

Both ABBYY and Bizagi are recognized as leaders in their respective technologies: ABBYY, as leader in [Intelligent Document Processing \(IDP\) Products PEAK Matrix® 2020](#) by esteemed consulting and research firm Everest Group and Bizagi, as leader in the 2019 [Forrester Wave™ for Digital Process Automation](#).

Faster and more accurate processes.

By eliminating the manual, error-prone handling of documents and data entry with ABBYY, Bizagi users realize faster and more accurate automated document-centric business processes.

Accelerate digital transformation.

Both ABBYY and Bizagi integrate with leading robotic process automation (RPA) platforms (Automation Anywhere, Blue Prism, UiPath), allowing enterprises to forge enterprise-wide digital transformation with the powerful combination of artificial intelligence (AI), digital process automation, and RPA.

Intelligent automation for KYC and loan origination, fraud, accounts payable, and supply chain.

Both ABBYY and Bizagi platforms are empowered with AI/machine learning, become smarter with use, and deliver peak performance. Combined, they provide a scalable solution that is quick and easy to use for both the business and technology user.

Case Study: National US Bank

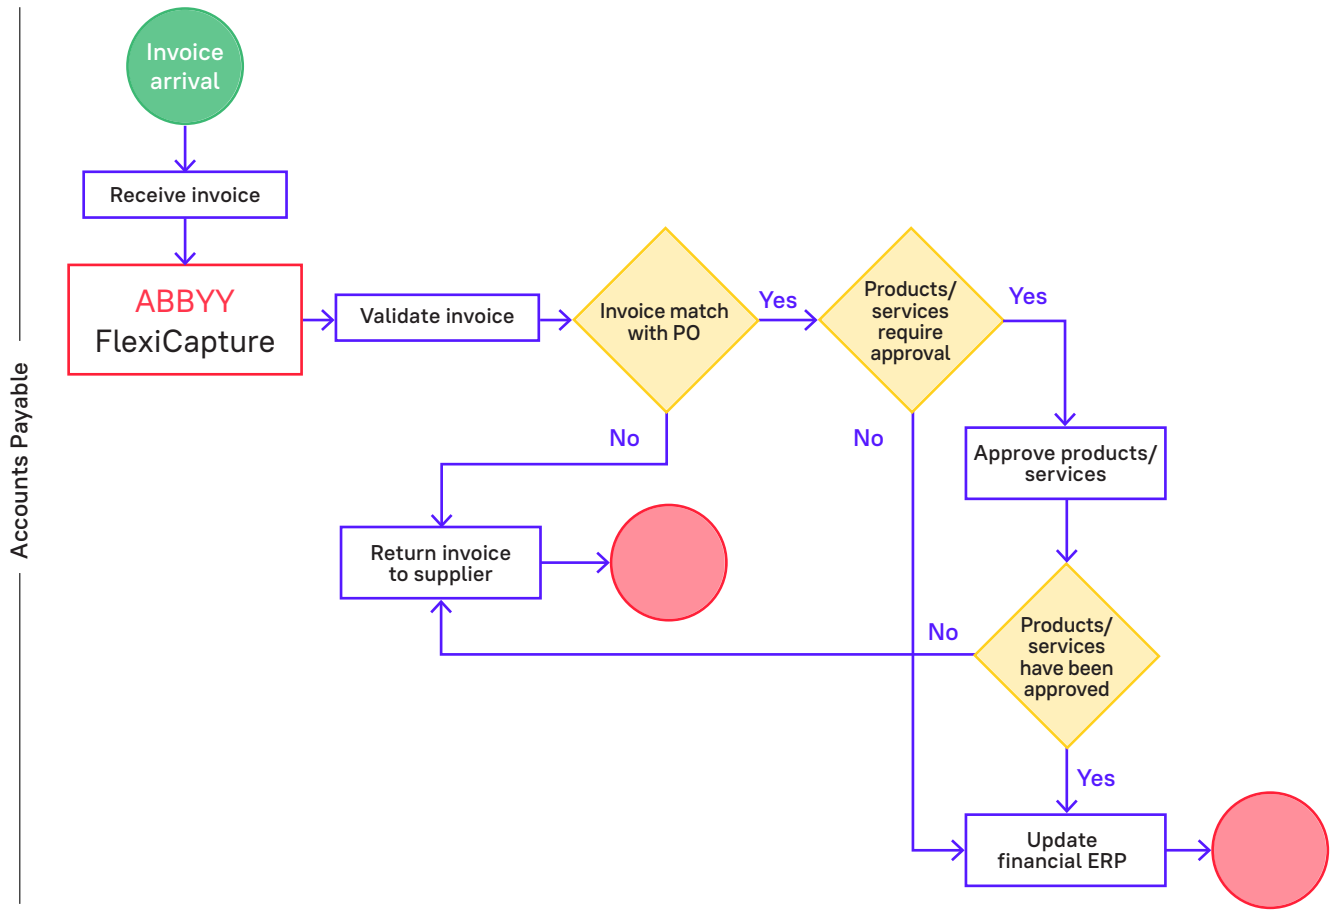

- ✔ COVID relief loan applications
- ✔ ABBYY/Bizagi/RPA solution deployed in 48-72 hours
- ✔ Unparalleled visibility at all stages of the process
- ✔ Manage loan applications in minutes instead of days

“ The ability to respond and automate at this hyper-level is a game changer and made a real difference in people’s lives. We are closing in on saving more than 150,000 jobs. Our next move is looking at automating a loan forgiveness solution.

Chief Operating Officer

How it works

ABBYY and Bizagi work hand in hand to deliver a best-in-breed intelligent process automation solution, which is applicable to any business process, including Accounts Payable, as illustrated below.

Product Descriptions:

ABBYY

ABBYY FlexiCapture intelligently classifies and extracts data from structured, semi-structured, and unstructured business documents:

- ✓ Best-of-breed OCR and AI-enabled data capture removes friction from document-intensive, automated processes and delivers strategic value from the data within
- ✓ Uncovers actionable information for faster insights and more efficient and accurate automation results
- ✓ Expands automation of content-centric processes that involve documents, images, and text
- ✓ Offers business-ready, pre-trained models that facilitate quick and easy deployment of advanced automation projects

bizagi

Bizagi Low-Code Intelligent Process Automation Platform is the one platform for every process to drive digital transformation:

- ✓ A single platform that easily addresses your simple departmental workflows all the way through your most sophisticated and mission-critical solutions
- ✓ Orchestrate your people, processes, systems, bots, and data to address your exact business needs with a best-of-breed technology approach
- ✓ Continue to use your existing technology investments by orchestrating legacy systems with new solutions
- ✓ Accommodate rapid change with an intuitive, low-code process automation platform that enables both citizen and professional developers
- ✓ Create efficient and effective processes and applications that increase your customer and employee satisfaction levels

Two ABBYY/Bizagi connectors are available for immediate use:

ABBYY Automapping Connector Generator

When you know exactly which document(s) are coming

- One-time drag-and-drop mapping for specific document data—build once, use everywhere
- Available on Bizagi versions 11.2.4+
- Available through Bizagi Connector Editor's Templates

ABBYY FlexiCapture Integration Connector

When you are expecting many types of documents

- Send batches of documents for identification and processing
- Parse incoming document data
- Available on Bizagi versions 11.2.4+
- Download from ABBYY web page [here](#), or on the Bizagi Connector Xchange

About Bizagi

Bizagi's industry leading platform for intelligent process automation connects people, applications, robots, and information. As the most business friendly and flexible solution on the market, Bizagi enables true collaboration between business and IT, delivering faster adoption and success. Fueled by a community of over one million users, Bizagi powers enterprises worldwide including adidas, BAE Systems, and Old Mutual. For more information, visit www.bizagi.com

About ABBYY

ABBYY empowers organizations to gain a complete understanding of their business processes and the content that fuels them with its [Digital Intelligence](#) platform. ABBYY technologies are used by more than 5,000 companies, including many of the Fortune 500, and is recognized for its leadership in [Intelligent Document Processing \(IDP\)](#) and [Process Discovery & Mining](#) for driving significant impact where it matters most: customer experience, effectiveness, profitability, and competitive advantage. ABBYY is a global company with offices in 14 countries. For more information, visit www.abbyy.com/company/about-us/.
