Bizagi Spark

From Project to Program – in three simple steps

- Are you looking to implement your first process automation project?
- Do you need to embed process automation across your organization?
- Is your business ready to establish process automation as a global shared service?
- **We've got the answers.**

Energize. Empower. Expand.
Ignite your BPM program with Bizagi Spark

Top down or bottom up - wherever you are on your process automation journey, Bizagi can help. Spark is a three-step modern project management framework designed to bring fast results and long term process improvement.

By helping you start small, think big and scale fast, Spark is based on agile project management methods that do away with the monolithic and rigid implementations of the past. Based on knowledge gained through global process automation projects across industries, we have the know-how, the people and the platform for your success.

Bizagi Spark: at a glance

Top Down or Bottom Up Strategy

1/ Energize
QuickStart

Got a burning process problem?
We'll help you automate it in just 7 weeks using our QuickStart.

2/ Empower
OnTarget Methodology

Build on what you've learned
and automate more processes in line with our proven methods.

3/ Expand
Center of Excellence

Create a global shared service using our COE model
and establish Bizagi as the driver behind process improvement.

How does Spark work?

Bizagi's Spark Program is based on three key steps. Each builds on the first, so whatever your stage of BPM maturity, the process is the same.

1/ Energize

Select the right process and see value in 7 weeks

QuickStart is the first and most critical step of the Spark methodology. We'll help you select a 'Quick Win' process to automate first – enabling you to deliver tangible value fast.

- ✔ Build momentum into your program
- ✔ Gain stakeholder buy-in
- ✔ Instil confidence in process
- ✔ Increase process automation knowledge transfer

**For more details download QuickStart Data Sheet ➔**

2/ Empower

Replicate your BPM success with OnTarget Methodology

The second step of the Spark framework expands what you learned from the QuickStart and enables you to progress towards your second process build.

- ✔ Embed rigorous process automation procedures using OnTarget methodology
- ✔ Instil disciplines to establish a Bizagi Competence group
- ✔ Replicate process automation rigorously & consistently

For more details download OnTarget Methodology Data Sheet ➔

Project Management

Initiate

	1. Assess	2. Design	3. Build	4. Certify	5. Implement
Organization	Process selection in order to guarantee success and user satisfaction	Define and design the solution in Bizagi Terms	Build the process in a diferent and correct way	Check that the process meets business needs	Process is ready to be used in the production environment

Change Management

3/ Expand

Deliver enterprise-wide BPM on a global scale

The final step of the Spark framework builds on your previous successes and provides the knowledge and tools you need to establish a global BPM Shared Service using Bizagi's COE model.

✔ Strategically map Bizagi to your enterprise architecture

✔ Align your process automation roadmap to your corporate strategic drivers

✔ Define BPM best practices for your organization

✔ Measure and improve your BPM performance
